Application/Control Number: 10/563,562

Art Unit: 1621

Claims 31-60 are pending in this application. Applicants' response to the election of species requirement filed 04/20/2010 is acknowledged by the examiner. The previous restriction requirement did not use the claim set given in the preliminary amendment filed 04/04/2006 and at the request of applicants the examiner is setting forth a new restriction requirement based on this preliminary amendment. The inadvertent error is regretted.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 31-47, 48 and 57 drawn to processes involving Diels-Alder reactions.

Group II, claim(s) 31-47, 49, 50, 58 and 60, drawn to processes involving the Heck reaction..

Group III, claim(s) 31-37, 49, 51 and 59, drawn to processes involving the Suzuki reaction..

Group IV, claim(s) 31-47, 49 and 52, drawn to processes involving the Sonogashira reaction.

Group V, claim(s) 31-47 and 49, drawn to processes involving the Ullman reaction.

Group VI, claim(s) 31-47 and 53, drawn to processes involving the Baylis-Hilman reaction.

Group VII, claim(s) 31-47 and 54, drawn to processes producing alpha amino acids.

Group VIII, claim(s) 31-47 and 55, drawn to processes involving Grieco-type reactions.

Group IX, claim(s) 31-47 and 56, drawn to processes producing tetra substituted olefins.

Art Unit: 1621

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I-IX involve disparate reactions with different reactive groups and reagents.

Applicants are further required to elect a single disclosed species, i.e. a single disclosed process where all reactants, reaction steps and products are specified.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof.

Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case.

Where such evidence or admission is provided by applicant, if the examiner finds one of

Art Unit: 1621

the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PETER O'SULLIVAN whose telephone number is (571)272-0642. The examiner can normally be reached on M-F 8-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Sullivan can be reached on (571) 272-0779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
